

Sadara Participates in 17th Annual GPCA Forum

JUBAIL INDUSTRIAL CITY, Saudi Arabia, Dec. 5, 2023 -- Sadara Chemical Company (Sadara) is participating in the 17th Annual Gulf Petrochemicals and Chemicals Association Forum on Dec. 4-6, 2023, in Doha.

Sadara CEO, Fayez Al Sharef, is heading Sadara delegation at the forum, which is being held under the theme, "Mobilizing Chemistry for Impactful Transformation."

The annual forum brings together global and regional industry leaders to discuss topics ranging from sustainability and innovation to portfolio transformation, restructuring, balance costs, achieving true net-zero emissions, and building resilience.

During the three-day event, Sadara delegation will exchange knowledge and insights on the critical role of chemistry in driving innovation and sustainability across various industries, interact and network with industry leaders to explore business opportunities.

Commenting on Sadara's participation in the event, Al Sharef said, "We are delighted to participate in the annual forum, which is one of the most important gatherings for the region's petrochemical industry and plays a vital role in shaping the future of our sector. It has been very encouraging to reconnect with our industry peers and discuss the latest developments and trends transforming the industry."

The GPCA forum, known for its role in shaping the future of the petrochemicals and chemicals industry in the Gulf region, offers a unique platform for professionals to network, exchange ideas, and explore new business opportunities.

This year's forum features inaugural Solutions Xchange – an interactive knowledge-sharing platform, providing practical solutions and insights designed to shape the chemical industry's future.

About Sadara:

Sadara is a joint venture developed by the Saudi Arabian Oil Company (Saudi Aramco) and The Dow Chemical Company. Sadara is a multi-billion-dollar world-scale chemical complex in Jubail Industrial City II in Saudi Arabia's Eastern Province. Comprised of 26 world-scale manufacturing units, the Sadara chemical complex is the world's largest to be built in a single phase and is the only chemical company in the Middle East to use refinery liquids, such as naphtha and natural gasoline, as feedstock. By using best-in-class technologies to crack refinery liquid feedstock, Sadara will enable many industries that either currently do not exist in Saudi Arabia or only exist through imports of raw materials.
